

INSTRUCTIONS FOR JOURNAL CONTRIBUTORS
Journal of Natural Gas Engineering

Scope

The Journal of Natural Gas Engineering's (JNGE) mission is to publish peer-reviewed, original research seeking sustainable methods of worldwide energy production through engineering, scientific, and technological advances. As the world moves into a new era, searching for sustainability from both environmental and economic points of view, there is increasing attention on renewable energy, such as wind, solar, and geothermal, while there is still a strong dependence on fossil fuels, such as oil, natural gas, and coal. JNGE introduces new and cutting-edge processes and technologies across all areas of energy production, transportation, and transmission, including fossil fuels and renewable energy. In the areas of fossil fuels, JNGE presents research and practical applications in the areas of oil, gas, and coal exploration and production, pipelines for oil, natural gas, and LNG transportation, refining, remediation, and many other topics central to the oil and gas and coal industries. In the areas of renewable energy, JNGE presents research and practical applications in wind and solar forecasting, transmission, and materials, such as wind turbines and solar panels. The economics and environmental science involved in energy production will also be covered in JNGE, along with any other issues endemic to the field.

Open Access

Although the *Journal of Natural Gas Engineering* is a subscription-based journal, we do accept "Open Access" articles. If authors prefer this type of availability, please send an e-mail message to openaccess@scrivenerpublishing.com for terms and conditions.

1. Submission of a Manuscript for Review

Manuscripts should be submitted through the online system at: <http://JNGE.msubmit.net/>
First-time users need to register. The registration and the uploading of manuscript and figures are intuitive but there are also help files and methods to contact us if you have problems.

The manuscript should be in double-spaced form in Word with figures, tables, and their captions/legends integrated and placed in correct order.

If the submission has supplementary material then this should be posted at submission stage as well. Authors should take the time to obtain permissions (if they are using figures that have been previously published) and check all references, figures, tables, and text for errors before submission of the manuscript. Any incomplete manuscript will cause a delay in the review process and ultimately in publication.

2. Submission of an Accepted Manuscript for Publication

Final manuscript to be submitted using the same online system. Please follow the instructions below.

2.1. Figure Resolution

The online edition will be in color, so submit ALL figure files in color. However, as there will also be printed issues, figures need to be made ready for print. Generally, figure resolution needs to be 600 dpi *at the size it will be used*. (Keep in mind that large figures will need to be downsized by our typesetter.) The exceptions are line art, which should be 800 dpi *at the size it will be used*, and grey scale charts and photos, which should be 400 dpi *at the size they will be used*. Save all scanned files as either high-resolution TIF or EPS.

2.2. Figure File Naming

When creating a file name for your electronic figures, avoid all punctuation except the hyphen, as these can corrupt the file. Use your surname and fig number (For example: use “Smith-07.tif”

2.3. Figures and Tables Designation

Make sure to note the approximate placement in the manuscript. Each figure and table should be referenced to in the appropriate place in the text

2.4. Captions, Headings, and Credits

Figure captions should be in sentence style and should be displayed as “Figure 9”. Table headings should be displayed as “Table 1”. If there are credits for figures or tables, they follow the caption or heading in parentheses. Captions and headings should be sufficiently descriptive so that the table or figure is understandable should it stand alone in page placement. Captions and headings should not be saved with the figure, but in the separate List of Figures and Tables.

2.5 Color, Black & White

The journal will be printed in black & white unless the author pays a fee toward color printing which is \$1000.00. This fee is payable at the time of final submission. The typesetter will convert all color figures to black & white.

3. Conflict of Interest

All financial support the contributor(s) have received to research covered in the contribution must be acknowledged in the contribution, including any industry or business support. Any potential appearance of conflict of interest regarding financial or commercial related interests should be discussed with the Editor in order to evaluate if any further acknowledgement in the contribution should be made.

3.1. Scrivener's Position on Publishing Ethics

With the global growth of published articles as well as the expansion of publishing platforms and media, it has become crucially important to have a publishing ethics code. Scrivener Publishing, its editors and editorial board members, peer-reviewers, and authors, all have a moral imperative to do our best to ensure our code is adhered to. We need to demonstrate that our journals and the authors' work have been reviewed as well as possible so we can contribute with integrity to building the knowledge network.

3.1.1. Plagiarism

Plagiarism and other forms of cheating or unethical behavior in any form will not be tolerated. Any contributor who is proven to engage in intentional plagiarism or other forms of cheating or unethical behavior will be prohibited from submitting any other manuscripts to the journal for a minimum period of three years. Notices of the retraction of such manuscripts will be published in the journal. Self-plagiarism in which authors use their own work but do so uncited, is also regarded as unethical.

Each article submitted to the journal is run through "iThenticate" (<http://www.ithenticate.com/>) plagiarism detection software. A report is generated that shows text overlap with published material as well as pages found on the internet. The report is made available to the peer-reviewers and editors, and authors will be asked to comment when necessary. Scrivener partners with the CrossRef Association (<http://www.crossref.org/>) and their CrossCheck database by supplying all published issues so other iThenticate users can benefit.

4. Manuscript

A manuscript will be accepted with the understanding that its content is unpublished in any form and is not being submitted for publication elsewhere. All accepted manuscripts and artwork become the property of the publisher. Generally, research manuscripts are not to exceed fifteen (15) pages including tables and figures. Supplementary information can be added to the manuscript, to be made available online only. Review and solicited manuscripts may be longer but only with the permission of the Editors.

Allow margins of at least one inch (3 cm) on all sides of the typed pages. The type size should be 12-point type (Times New Roman). Manuscript pages should be numbered consecutively throughout the paper. The manuscript must be formatted according to these Instructions for Contributors.

4.1. Title

All titles must be as brief as possible, 6 to 12 words. Authors should also supply a shortened version of the title suitable for the running head, not exceeding 50 character spaces.

4.2. Affiliation

On the title page, include full names of contributors, academic and/or other professional affiliations, and the complete address, telephone number, fax number, and e-mail address of the contributor to whom proofs and correspondence should be sent. Correspondence is allowed only between the Editor and corresponding contributor.

4.3. Abstract

Each article should be summarized in a double-spaced abstract of not more than 150 words. Avoid abbreviations, diagrams, and references to the text.

4.4. Keywords

Contributors must supply 3-5 alphabetized key words or phrases that identify the most important subjects covered by the paper.

4.5. References

Citation to *Journal of Natural Gas Engineering* is *J. Sustainable Energy Eng.*

Reference numbers in the text should be in square brackets and at the same level as the text. References should be arranged numerically and should be collected in the reference section in the order cited. Do not use “et al.” but list all authors. Follow the style below please.

Journal article:

A. Basu, J. Akhter, M.H. Rahman, and M.R. Islam, A Review of Separation of Gases Using Membrane Systems. *J. Pet. Sci. Tech.* **22**. 1343-1368, (1995).

Authored book:

J. Kucera, *Reverse Osmosis*, pp. 32-33, Wiley-Scrivener, Salem, Mass, (2010).

Chapter in edited volume:

S. Anwar and J.J. Carroll, “Properties of CO₂ Relevant to Sequestration--Density,” in *Acid Gas Injection and Related Technologies*, Y. Wu and J.J. Carroll, (Eds.), pp. 75-80, Wiley-Scrivener, Salem, Mass (2011).

Technical Report:

Welded Tanks for Oil Storage, API STD 650, (2011)

Web Citation:

U.S. Department of Energy, U.S. Hydropower Potential from Existing Non-Powered Dams, <http://energy.gov/maps/us-hydropower-potential-existing-non-powered-dams> (2012).

Patent:

W.A. Anderson and G.N. Meckling, Polymeric bicyclo-(2,2,1)-2-heptene, US Patent 2721189, assigned to DuPont (October 18, 1955).

5. Permissions to Reprint

Contributors are responsible for obtaining permission to reproduce in print and digital formats

copyrighted material from other sources. These permissions should be finalized immediately after the contributor has a confirmation of acceptance. Appropriate acknowledgement, either in the figure caption or at the end of the article, must be incorporated to the final version.

6. Proofs

All proofs will be in a PDF format and must be corrected and returned to the publisher within 72 hours of receipt. If the corrected proof is not returned within the allotted time, the Editor will proofread the article and send it for publication as per his instruction. At this stage, only correction of typographical errors is permitted. The contributor will be charged for additional major alterations to text at the proof stage. Authors are requested to use the editing features in Adobe Acrobat for correcting. In the event of a non-response from a contributor, the Editor has the option to delay publication of the paper until a response is received.

7. Post-publication PDF

Each corresponding contributor of the article will receive a complete copy of the article in PDF format. The corresponding author is responsible for distribution of copies to co-contributors. The article should not be posted on websites.

8. Journal Contributor Agreement

Contributors are required to sign the “Journal Contributor Agreement” that incorporates the transfer of copyright to the publisher. Under copyright law, the transfer of copyright from the contributor to publisher must be explicitly stated to enable the publisher to ensure maximum dissemination of the contributor’s work. The completed form must be returned to the publisher before any manuscript can be assigned for publication.

9. Questions

If you have any questions concerning these instructions please contact journals@scrivenerpublishing.com
